CCTV Surveys

COMPREHENSIVE SURVEY AND INSPECTIONS

At Diamond Drainage we are proud to be at the forefront of CCTV survey and technology, by using the latest in advanced CCTV pipeline equipment and highly trained personnel we can immediately assess the structural conditions and integrity of the pipe.

We are capable of surveying multi diameter pipes, ducts, tanks, drains and sewers from 50mm upwards utilising high specification, remote controlled cameras and software.

From the data collected we compile a comprehensive report with essential information, locations and footage, with still photographs of problem areas sent electronically direct to your inbox.

Drain and Sewer Relining

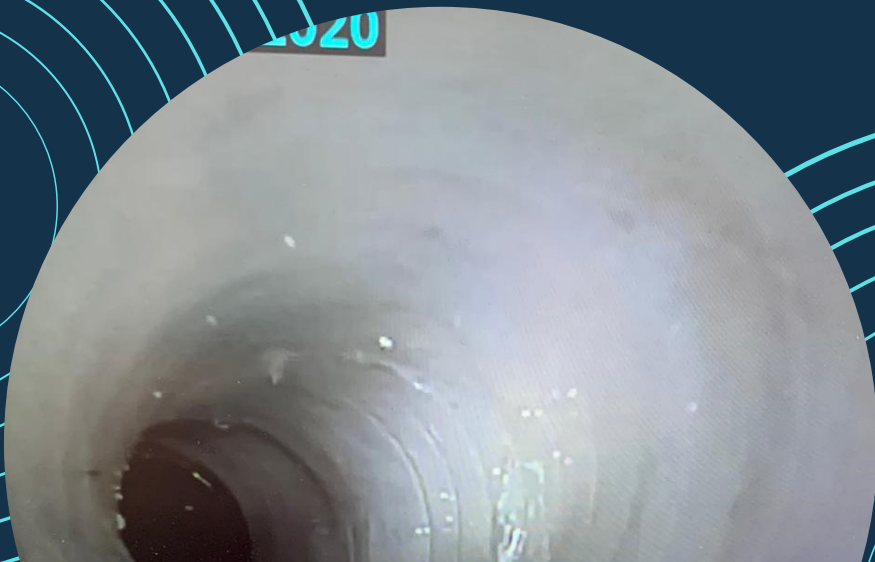

NO DIG REPAIRS

Drain and Sewer Patch Relining is a cost effective no-dig method and a cost effective alternative to the traditional repairs. Excavation's cause disruption and sometimes not feasible to conduct due to the pipework running under a building or premises.

Diamond Drainage is a qualified factory installer for the safe and correct installation of the no-dig repair system and accredited by the energy and utility skills.

The repair system can be applied to open joints, cracks, tree root infiltration and many other pipe integrity problems. The patch relining system offers the perfect alternative to traditional costly excavations.
